A Conversation on

PARENTING AND CHILDREN'S ANXIETY

Beyond Behaviours: When Is It More? What it looks like ages 4-8 years.

Description: When our children are having a hard time, or we are seeing something for the first time, we might wonder what's going on? In this video conversation, a parent and a counsellor talk about the developmental stages of 4 to 8 year old children, what are typical behaviours, and how do we know when something more might be going on.

This conversation is for all families and caregivers who feel like they are parenting in the deep end of the swimming pool or are just wondering what they can do when it feels like something more may be going on.
